

Solid State Relays PCB, 1-Phase ZS Types RAP 40 A ., RAP 48 A .

- AC Solid State Relay for PCB mounting
- Zero switching
- Rated operational current: 3 or 5 AACrms
- Non-repetitive voltage: Up to 1200 V_p
- Rated operational voltage: Up to 480 VACrms
- Input range: 3.5 to 40 VDC
4.5 to 40 VDC
- Insulation: OPTO (input-output) 4000 VACrms
- LED status indication
- Low off-state leakage current
- High surge ratings

Product Description

The RAP-series from Carlo Gavazzi is a Solid State Relay family for socket- or PCB-mounting. With built-in LED status indication for control input, the relay is an ideal interface between PLC's or other logic controls and load. The housing design and packing allows automatic insertion and soldering.

The relay has been designed to switch inductive or resistive loads as long as enough attention is paid to the specifications stated in this data

sheet, e.g. max. current, ambient temperature etc.

The use of optotriacs for galvanic separation together with alternistors as output devices give the most advanced performance. Additional snubbers are no longer necessary. The zero switching relay also works with inductive loads due to its high surge capability. An internal heatsink optimizes the thermal resistance between chip and ambient air, thereby increasing the lifetime of the relay.

Applications

These relays can be used to switch heaters, motors, lights, valves or solenoids. When used at full load current, the relays must be placed vertically. If more than one relay is mounted, please allow a minimum distance of 20 mm between for sufficient air cooling.
