DESCRIPTION:

The DP3Z2MX16PMTY5/DP3Z2MX16PMBY5 is a 32 megabit 3.3 Volt only CMOS Flash EEPROM (Electrically In-System Programmable and Erasable ROM Memory) module. These modules are constructed of two 1M x 16 FLASH EEPROM's that are configured as a 2M x 16.

The module features high speed access times with common data inputs and outputs. The Flash devices used in this module also features BGO (Blank Ground Operations). This feature allows Program or Erase operations to be performed on one bank of the device while a read operation is performed on the other bank.

FEATURES:

- Organizations Available: 2M x 16
