Description

The Filtronic LMA110B is a GaAs monolithic distributive amplifier which operates from 0.5 to 8 GHz. This amplifier produces a typical gain of 12.5dB with a noise figure of 3.5dB. The LMA110B is suitable for wide-band low noise gain block, EW and commercial PCN applications. DC decoupled input and output RF port. Ground is provided to the circuitry through vias to the backside metallization.
