TIMING EXTRACTION FILTER (50 to 300MHz)

F4 SERIES

■ DESCRIPTION

The F4 series are timing extraction filter used in the high-grade digital transmission equipment like wide-band ISDN. The F4 series uses a single lithium tantalate piezoelectric crystal (LiTaO_3) that has large electromechanical coupling coefficient, and a unique SAW resonator. That provides wide bandwidths, insertion loss, and exceptional stability in VHF band until 300MHz.

■ FEATURES

- Wide frequency range: 50 to 300MHz
- Wide band width: 0.3 to 1.0%
- Low insertion loss: 6dB or less
- Excellent temperature characteristics:
 ± 200 ppm or less (0 to 60°C)
- No adjustment is required due to small frequency deviation:
 $\Delta f_0 < \pm 500$ ppm
- High reliable hermetically sealed package
- Small type, and compatible with 14-pin DIP IC

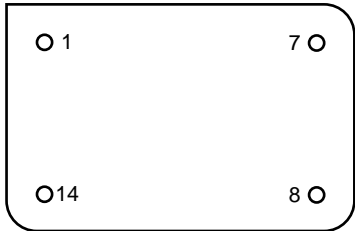

■ PACKAGE

14-pin DIP size metal case
