FL07-0002-G

Low Cost SMT Low Pass Filter DC - 2000 MHz

Features

- Small Size and Low Profile
- Industry Standard SOIC-8 SMT Plastic Package
- Superior Repeatability
- Typical Insertion Loss 0.6 dB
- Typical Rejection 20dB
- 2 Watt Power Handling

Description

M/A-COM's FL07-0002-G is an IC-based monolithic low pass filter in a low cost SOIC-8 plastic package. This filter is ideally suited for applications where small size, low cost and low loss are required.

Typical applications include base station switching networks and portable phones where size and PCB real estate are at a premium. Available in tape and reel.

The FL07-0002-G is fabricated using a passive-integrated circuit process. The process features full-chip passivation for increased performance and reliability.
