TOSHIBA CMOS Digital Integrated Circuit Silicon Monolithic

TC7MZ4051FK,TC7MZ4052FK,TC7MZ4053FK

TC7MZ4051FK 8-Channel Analog Multiplexer/Demultiplexer TC7MZ4052FK Dual 4-Channel Analog Multiplexer/Demultiplexer

TC7MZ4053FK Triple 2-Channel Analog Multiplexer/Demultiplexer

The TC7MZ4051/4052/4053FK are high-speed, low-voltage drive analog multiplexer/demultiplexers using silicon gate CMOS technology. In 3 V and 5 V systems these can achieve high-speed operation with the low power dissipation that is a feature of CMOS.

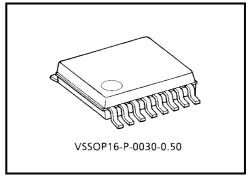

The TC7MZ4051/4052/4053FK offer analog/digital signal selection as well as mixed signals. The 4051 has an 8-channel configuration, the 4052 has an 4-channel \times 2 configuration, and the 4053 has a 2-channel \times 3 configuration.

For example, if $V_{CC} = 3 \text{ V}$, GND = 0 V, and $V_{EE} = -3 \text{ V}$, signals between -3 V and +3 V can be switched from the logical circuit using a single 3 V power supply.

All input pins are equipped with a newly developed input protection circuit that avoids the need for a diode on the plus side (forward side from the input to the VCC). As a result, for example, 5 V signals can be permitted on the inputs even when the power supply voltage to the circuits is off. As a result of this input power protection, the TC7MZ4051/4052/4053FK can be used in a variety of applications, including in the system which has two power supplies, and in battery backup circuits.

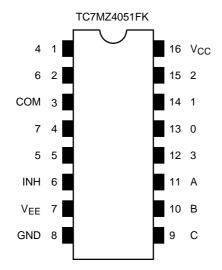

Weight: 0.02 g (typ.)

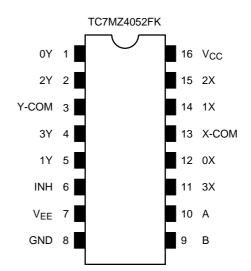

Features

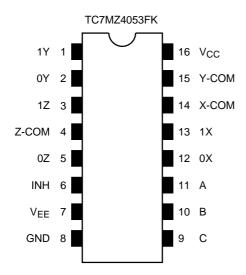

- Low ON resistance: $R_{on} = 22 \Omega$ (typ.) (V_{CC} V_{EE} = 3 V) $R_{on} = 15 \Omega$ (typ.) (V_{CC} - V_{EE} = 6 V)
 - High speed: $t_{pd} = 3$ ns (typ.) (V_{CC} = 3.0 V)
- Low power dissipation: $ICC = 4 \mu A \text{ (max)}$ (Ta = 25°C)
- Input level: $V_{IL} = 0.8 \text{ V (max)} (V_{CC} = 3 \text{ V})$
 - $V_{IH} = 2.0 \text{ V (min)} (V_{CC} = 3 \text{ V})$
- Power down protection is provided on all control inputs
- Pin and function compatible with 74HC4051/4052/4053

Note1: $R_L = 1 k\Omega$

Note2: C_{in} , C_{IS} , C_{OS} and C_{IOS} are guaranteed by the design.

Note3: C_{PD} is defined as the value of the internal equivalent capacitance of IC which is calculated from the

6

operating current consumption without load.

Average operating current can be obtained by the equation:

 $I_{CC (opr)} = C_{PD} \cdot V_{CC} \cdot f_{IN} + I_{CC}$

RESTRICTIONS ON PRODUCT USE

000707EBA

- TOSHIBA is continually working to improve the quality and reliability of its products. Nevertheless, semiconductor devices in general can malfunction or fail due to their inherent electrical sensitivity and vulnerability to physical stress. It is the responsibility of the buyer, when utilizing TOSHIBA products, to comply with the standards of safety in making a safe design for the entire system, and to avoid situations in which a malfunction or failure of such TOSHIBA products could cause loss of human life, bodily injury or damage to property.
 In developing your designs, please ensure that TOSHIBA products are used within specified operating ranges as set forth in the most recent TOSHIBA products specifications. Also, please keep in mind the precautions and conditions set forth in the "Handling Guide for Semiconductor Devices," or "TOSHIBA Semiconductor Reliability Handbook" etc..
- The TOSHIBA products listed in this document are intended for usage in general electronics applications (computer, personal equipment, office equipment, measuring equipment, industrial robotics, domestic appliances, etc.). These TOSHIBA products are neither intended nor warranted for usage in equipment that requires extraordinarily high quality and/or reliability or a malfunction or failure of which may cause loss of human life or bodily injury ("Unintended Usage"). Unintended Usage include atomic energy control instruments, airplane or spaceship instruments, transportation instruments, traffic signal instruments, combustion control instruments, medical instruments, all types of safety devices, etc.. Unintended Usage of TOSHIBA products listed in this document shall be made at the customer's own risk.
- The products described in this document are subject to the foreign exchange and foreign trade laws.
- The information contained herein is presented only as a guide for the applications of our products. No responsibility is assumed by TOSHIBA CORPORATION for any infringements of intellectual property or other rights of the third parties which may result from its use. No license is granted by implication or otherwise under any intellectual property or other rights of TOSHIBA CORPORATION or others.
- The information contained herein is subject to change without notice.
