

TIGHTpak™ Toroidal Common Mode Line Choke

Actown's Toroid style of common mode chokes are designed with patented TIGHTpak technology. Within a single layer winding 70% more turns are achievable over a traditional winding using the same size core and wire gauge.

Parts are constructed to an industry standard footprint. Materials comply with 94V-0 flammability specifications. A 3mm spacer between each winding provides creepage and clearance to comply with UL, CSA, and IEC safety specifications.

Current rating based on 250 circular mils/amp
 Inductance measured @ 10Khz .10Vrms
 Electrical specifications at 25C
 Operating temperatures -40C to 85C
 1500 Vrms dielectric between windings

AMVECO STANDARD SERIES INDUCTORS

In addition to toroidal transformers, Amveco designs and manufactures toroidal chokes for DC-filtering and AC-circuits. As with transformers, toroidal chokes also offer significant savings in both size and weight compared to a laminated core. Presently, we manufacture chokes from 0.2 Ws to 25 Ws. AMVECO has developed its own design software which allows us to design and manufacture to your specific needs. With in-house capabilities for both core-making and core-cutting, we can offer fast turn-around for both prototypes and production units.

POWER TRANSFORMERS FOR AUDIO APPLICATIONS

Features

- Power Transformers for Audio Applications
- UL 6500 Audio Standard
- Low Audible Noise
- Low Magnetic Stray Field
- Non-Encapsulated Units
- Metal Disk Mounting

OFF-THE-SHELF, STANDARD TRANSFORMERS

Primary 117v/60Hz
