## Quick-Test Tweezers

**\$70.00**

[larger image](#)

A compact, lightweight digital meter integrated with comfort-grip tweezers allows fast, precise measurements of small components and circuits. Quick-Test Tweezers simplify quality assurance inspections of incoming circuit boards or loose components, as well as troubleshooting and production checks by electronic manufacturers. They are an economical, handy replacement for bulky LCR multi-meters. These value-priced instruments allow one-touch identification and testing of SMDs, as well as short-circuit diagnosis.

Ideal for checking a component's [impedance](#) (inductance, capacitance and resistance), testing its diode polarity or measuring currents in operating circuits. The AutoScan model immediately recognizes whether a component is a capacitor or resistor, with no mode change needed.

Features:

- Accuracy matches or exceeds conventional professional devices
- Measures voltage and checks operation of printed circuit boards
- Precise tips handle components as tiny as 0.3mm
- AC or DC voltage measurements
- Displays active and reactive impedance components
- AutoScan automatically identifies component and measures impedance
- Light weight (under two ounces) and ergonomic design reduces fatigue or strain
- High-visibility bright yellow case makes tool easy to find
- Long-lasting battery

## Specifications:

- Display 2/23 digits LCD with max reading 2999, 5/56 digits LCD with max reading 5999
- Over Range indicator-LCD will display "OL"
- Low Battery indication
- Auto Power off after no key operation for 10 minutes
- Operates on 3V battery
- Dimensions 181(L) x 35(W) x 20(H)mm
- Weight 0.35 lbs. (with battery)

Model: 18910

Shipping Weight: 0.35lbs
